

UnitedHealthcare[®] Pharmacy Saver[™] Program

West Region:

Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, New Mexico, Nevada, Oregon, Utah, Washington and Wyoming

Participating pharmacies are located in these local retail grocery, drug and discount stores:

With Pharmacy Saver, your UnitedHealthcare Medicare patients could save money on prescription drugs.

As part of the patient support component of PATH,¹ Pharmacy Saver is UnitedHealthcare's cost savings prescription drug program for our Medicare plan members.² The program is offered at nearly 20,000 participating pharmacy locations nationwide.

If cost may be a factor in your UnitedHealthcare Medicare plan member's adherence to medications for chronic conditions such as diabetes, hypertension or hypercholesterolemia, consider talking to them about Pharmacy Saver.

- ▶ Pharmacy Saver features contracted rates at participating pharmacies for select generic medications that may be lower than the plan's copay
- ▶ Prices and coverage may vary based on drug, strength and quantity, or by participating pharmacy
- ▶ Prescriptions for as low as \$2.³ The plan member's ID card must be used at a participating pharmacy. Savings are available through the coverage gap
- ▶ Plan members are automatically eligible. No paperwork is required
- ▶ Plan members can switch their prescriptions available through Pharmacy Saver to a participating pharmacy any time, not just during the open enrollment period. Simply call, fax or have the member present their prescription and plan member ID card at a participating pharmacy

The table on the next page lists participating pharmacies in your area with the drug and strength, quantities and price for all Pharmacy Saver medications that are included in the Medicare Part D Medication Adherence Star Rating measures.

¹UnitedHealthcare's PATH program encourages greater use of preventive health care services by supporting our Medicare Advantage members and working with them to get them engaged with our physicians.

²Pharmacy Saver is available to UnitedHealthcare Medicare Advantage Part D and UnitedHealthcare MedicareRx for Groups (PDP) plan members.

³Drugs and prices may vary between pharmacies and are subject to change during the plan year. Prices are based on quantity filled at the pharmacy. Quantities may be limited by pharmacy based on their dispensing policy or by the plan based on Quantity Limit requirements; if prescription is in excess of a limit, copay amounts may be higher.
